

Ambassador

Keep safe. Keep farming.

Keep safe. Keep farming. Ambassador

With Safe Ag Systems™ Pty Ltd

Assist your community to create safer environments for work and play by delivering WHS educational programs and implementing safe systems of work appropriate for agribusiness owners.

What is the Keep safe. Keep farming. Ambassador program?

As a safety leader in your community, you will contribute to improving safety standards in agriculture and help to sustain a cultural shift toward safer behaviour on farms.

We will provide you with training, support and tools that enable you to take responsibility for your Client's education, purchase of Safe Ag Systems, system setup and repeat custom. In return for your effort and achievements, Safe Ag Systems offer our accredited Ambassadors attractive financial rewards.

Who is eligible to participate?

You must be a current Safe Ag Systems Client. The experience you gain from utilising the system for your agribusiness builds credibility and competence.

What are the financial rewards?

Safe Ag Systems reward its Ambassadors based on achievements throughout the sales process. These can include delivery of Keep safe. Keep farming. Workshops, sales and new Client setup and renewal of sales. Reward payments and program terms and conditions are detailed in our Ambassador Agreement.

What is the Keep safe. Keep farming. Ambassador community?

Approved Ambassadors will be united in a virtual community. You will share and learn from best practices and connect with like-minded leaders of safety change across rural Australia. We may also leverage this community from time to time to represent Safe Ag Systems for related industry events and other activities.

How do I become approved?

There are three essential steps to accreditation:

1. Demonstrate proficient use of Safe Ag Systems using your system – we will support and guide you to explore and implement all features of the system for your farming operation.
2. Completion of Keep safe. Keep farming. Workshop facilitator training – we will invest time to develop the skills you need to educate and sell to your prospective Clients.
3. Sign the Ambassador Agreement – which outlines the terms and conditions of the program.

Do Ambassadors provide WHS advice?

No. Ambassadors are not qualified WHS advisors and must not provide advice. Ambassadors will disseminate safety education materials and help agribusiness owners take advantages of the record keeping and productivity features of Safe Ag Systems.

Meet an Ambassador

Name: Kate Cowan

Location: Minyip, VIC

“Work health and safety best practice needs to be shared. I can start with my community.”
